11.	gu gul	Exd.	5G

S. No.	Drug Name	Parts	Weight
12.	tsher sñon	Pl.	20G
13.	btsod	Pl.	Quantity sufficient

Method of Preparation

This recipe is prepared in the form of a powder. *Ko byi* is a poisonous drug. It should be purified and detoxicated according to the method prescribed in Appendix-I, and then made to a powder. Similarly, *gu gul* which is a gum resin should be purified and made to a powder. Powders of ingredients at nos. 1-12 should be mixed together and impregnated with the juice of the ingredient at no. 13. This should then be triturated and dried. Thereafter, the powder should be stored in a clean glass bottle.

Indications : Arthritis of upper and lower joints.

Dose : 0.5gm., morning and evening in empty stomach.

Vehicle : Hot water after slightly cooled.

16.	ba śa ka	Pl.	60G
17.	skyu ru ra	Fr.	60G
18.	ru rta	Rt.	70G

Method of Preparation

This recipe is generally prepared in the form of pills. *Bi sa* is a poisonous drug. Before using in the recipe, it should be properly purified and detoxicated according to the procedure described in Appendix-I. Similarly, *gu gul* should be purified and made to a powder. Powder of all the ingredients, except ingredient no. 12, should be mixed together and triturated by adding water. At the end, item no. 12 should be triturated well with a small quantity of water, and this should be added to the paste of other drugs. The whole thing should then be triturated to make the paste very thin. From out of this, pills of 200 mg. each should be prepared and dried in the shade before storing in corked and clean bottle.

Indications : Obstinate skin diseases including leprosy, joint pain & chronic rhinitis.

Dose : One pill of 200 mg., in the evening.

Vehicle : Hot water after slightly cooled.

**4. Skad 'gags a ru bdun pa**

S. No.	Drug Name	Parts	Weight
1.	a ru ra	Fr.	100G
2.	cu gañ	Exd.	50G
3.	śiñ mñar	St.	50G

5.	sro lo	Pl.	50G
6.	sug smel	Fr.	50G
7.	li si	Fr.	50G

Method of Preparation

This is generally used in the form of pills. All the ingredients are triturated by adding water till the whole thing becomes a fine paste. Out of this, pills of 250 mg. each are prepared. These are to be dried and stored in a clean glass bottle.

Indications : Seven types of throat diseases involving voice (hoarseness).

Dose : Two pills 250 mg. each, morning, noon and evening.

Vehicle : Hot water after slightly cooled.

5. Skad sman 'dzam gliñ 'brug sgra

S. No.	Drug Name	Parts	Weight
1.	ghi vam	Exd.	25G
2.	gur gum	Fl.	50G

23.	ka ḥta ka ri	St.	25G
24.	sle tres	Pl.	50G
25.	star bu	Fr.	25G

Method of Preparation

This is generally used in the form of pills. Item no. 7, namely *brag zun* should be purified to remove extraneous material according to the procedure described in Appendix-I. Powder of all the ingredients should be added with water and sugar in the required quantity and triturated to a fine paste form. From out of this, pills of 250 mg. each should be prepared, dried and stored in a clean and dry bottle.

Indications : Blood diseases; should be used 7 days before blood-letting; purifies blood.

Dose : Two pills of 250 mg. each, morning, noon and evening.

Vehicle : Hot water after slightly cooled.

7. Skyer ſun brgyad pa

S. No.	Drug Name	Parts	Weight
1.	skyer ſun	St. Bk.	100G
2.	pi pi liñ	Fr.	40G
3.	skyu ru ra	Fr.	25G
4.	ſin mñar	St.	40G

6.	kha che gur gum	Fl.	25G
7.	dom mkhris	Exd.	75G
8.	rgya snag	Mi.	75G

Method of Preparation

This recipe is generally used in the form of powder. Powders of item nos. 1 to 4, 6 & 8 should be prepared in the beginning. To this, the powders of item nos. 5 and 6 should be added and mixed well. This powder should be stored in an airtight & clean glass container.

Indications : Dysuria and obstinate urinary diseases.

Dose : 500 mg., morning and evening.

Vehicle : Hot water.

8. Skran 'joms zla bsil

S. No.	Drug Name	Parts	Weight
1.	gur gum	Fl.	50G
2.	tig ta	Pl.	25G
3.	gser me tog	Fr.	25G
4.	ru rta	Rt.	50G
5.	brag žun	Exd.	25G
6.	a ru ra	Fr.	50G
7.	hoñ len	Rt.	25G
8.	se 'bru	Fr.	50G

Method of Preparation

This recipe is generally used in the form of powder. Item no. 5, i.e. *brag žun* should be purified to remove extraneous material and made to a powder. This should then be added to the powders of the remaining drugs and mixed well. To make this recipe specifically useful for different ailments, drugs described in the note below should be added. The powder should be stored in an airtight and clean glass container.

Indications : All types of phantom tumour.

Dose : 500 mg., morning and evening.

Vehicle : Hot water.

Note

- If the phantom tumour is caused by *mkhris pa* then *phag brun* should be added to the recipe.

2. If the phantom tumour is caused by *tsha*, then *con zi* and cowri shell in *thal sman* form should be added.
3. If the phantom tumour is caused by *khtag*, then *star bu mdze tshwa* should be added to the recipe.

☒

9. Dkar po drug

2.	ru rta	Rt.	5G
3.	šu dag	Rt.	3G
4.	btsan dug	Rt.	10G
5.	gla rtsi	Exd.	1.5G

Method of Preparation

This recipe is generally used in the form of pills. Item no. 4 is exceedingly poisonous. Therefore, it should be used only after purification and detoxication as prescribed in Appendix-I. Powder of item nos. 1 to 4 should be mixed together. To this, item no. 5, i.e. *gla rtsi* should be added and mixed well. This powder should be added with water

and triturated till it becomes a fine paste. From out of this, pills of 25 mg. each should be prepared. These pills should be dried in shade and stored in a clean glass bottle.

Indications : Obstinate skin diseases including leprosy; stiffness and inflammation of neck, rheumatic arthritis, abscess & carbuncles.

Dose : Five pills of 25 mg. each, in the evening.

Vehicle : Hot water after slightly cooled. Alcohols is strictly prohibited.

7.	gzer 'joms	Pl.	25G
8.	ar nag	St.	2.5G
9.	gla rtsi	Exd.	in small quantity

Method of Preparation

This is generally used in the form of powder. Item no. 5 i.e. *gu gul* should be purified, before adding, according to the procedure prescribed in Appendix-I. After that, powders of item nos. 1-8 are mixed together, small quantity of *gla rtsi* either in powder form or diluted in small quantity of water should be added and mixed well. The recipe should then be dried well in shade (to get the moisture content of it evaporated) and kept in a clean and dry glass container.

Indications : Diseases of blood & abdomen.

Dose : 500 mg., in the evening.

Vehicle : Hot water after slightly cooled.

Note:

If the patient has heat in excess, then *ko byi la*, after removing the skin & purifying, should be added to this recipe in the quantity of 2.5 g. in powder form.

14. Mkha' 'gro bcu'i sbyor ba

S. No.	Drug Name	Parts	Weight
1.	coñ ūzi	Mi.	50G

8.	pi pi lin	Fr.	20G
9.	byi tañ ga	Fr.	20G
10.	rgyam tshwa	Mi.	10G

Method of Preparation

This recipe is generally used in the form of powder. Item no. 4, i.e. *brag žun* is to be purified according to the procedure prescribed in Appendix-I before use. First of all, the powders of item nos. 1 to 3 and 5 to 9 should be mixed. Thereafter, the powder of item no. 5 should be added. At the end, item no. 10, i.e. *rgyam tshwa* should be made to a powder, added and mixed well. To this, the powder of white sugar in required quantity should be added. Sugar may otherwise be used as a vehicle.

Item no. 10, being a salt, is hygroscopic. Therefore, the recipe should be dried well and stored in a clean and dry glass jar well corked.

Indications : Diseases of the throat.

Dose : 500 mg., morning & evening.

Vehicle : Warm water or honey.

Method of Preparation

This is used in the form of pill. Item no. 1, i.e. *dñul chu*; no. 8, i.e. *gu gul*; no. 12, i.e. *mu zi ser po* and no. 25, i.e. *brag žun* should be purified according to the procedure prescribed in Appendix-I. Item no. 22, i.e. *śin kun* should be fried over a pan by adding a small quantity of ghee or butter. In the beginning, item nos. 1 and 12 should be triturated till a black and fine powder is formed. To this, powders of all the ingredients, except item no. 10 and 23, should be added. By adding water, these are to be

16.	su dag	Rt.	35G
17.	btsan dug	Rt.	100G
18.	gla rtsi	Exd.	25G

Method of Preparation

This is generally prepared in the form of pills. Item no. 1, i.e. *dñul chu*; no. 2, i.e. *mu ūi*; no. 13, i.e. *gu gul* and no. 17, i.e. *btsan dug* should be purified and detoxicated according to the method described in Appendix-I. Item nos. 1 and 2 should be triturated together till a fine black powder is formed. To this, water and powders of item nos. 3 to 17 should be gradually added and triturated till a fine paste is formed. At the end, item no. 18, i.e. *gla rtsi* should be added; and again triturated. From out of this paste, pills of 250 mg. each should be prepared and dried in the shade. This should be stored in a clean and dry glass bottle.

triturated. At the end, item nos. 10 and 23 are added and well triturated till a fine paste is formed. From out of this, pills of 250 mg. each should be prepared and dried in the shade. These pills are to be stored in a clean and dry glass bottle.

Indications : Colic pain, leprosy, phantom tumour, urinary diseases, arthritis, skin diseases, rhinitis, gout & kidney diseases.

Dose : Two pills of 250 mg. each, in the morning and evening.

Vehicle : Hot water.

Caution

Mercury in combination with sulphur in adequate quantity becomes non-toxic. In the present recipe, only a small quantity of sulphur is prescribed (vide - item no. 12). Therefore, many mercury particles will remain in uncombined form and these are, notwithstanding the process of purification & detoxication, likely to produce toxicity. The patient should, therefore, be closely watched during treatment and as soon as the ailment is cured, the treatment should be withdrawn. During the period of treatment, the patient should take salt free diet and plenty of milk and milk products.

43. Rin chen dñul chu bco brgyad

S. No.	Drug Name	Parts	Weight
1.	dñul chu	Mi	175G
2.	mu zi	Mi	175G

Indications : Arthritis and afflictions by evil spirits.

Dose : Two pills of 250 mg. each, morning and evening.

Vehicle : Hot water.

44. Mñon sum me 'dra'i sbyor ba

S. No.	Drug Name	Parts	Weight
1.	rgyam tshwa	Mi.	25G
2.	la la phud	Fr.	25G
3.	a za mo	Pl.	25G
4.	pi pi lin	Fr.	5G
5.	sga skyā	Rt.	5G
6.	a ru ra	Fr.	85G

Method of Preparation

This is generally prepared in the form of powder. Powders of item nos. 2 to 6 should be mixed together. Thereafter, powder of item no. 1 and some jaggery should be added. This should be stored in a clean and dry glass bottle well corked.

Indications : Indigestion, phantom tumour and cold.

Dose : 500 mg., in the morning.

Vehicle : Hot water slightly cooled or jaggery.

18.	ba ša ka	Pl.	25G
19.	ru rta	Rt.	25G
20.	pi pi liñ	Fr.	15G

Method of Preparation

This is generally prepared in the form of powder. Generally, this recipe is prepared with the first eleven ingredients. Remaining ingredients are, however, added by traditional physicians to make it therapeutically more

effective. All ingredients, except nos. 2 and 12, are to be made to powders and mixed together. To this, item nos. 2 and 12 should be added at the end and mixed well. This recipe should be stored in a clean and dry glass jar.

Indications : Poisoning and chronic fever.

Dose : 500 mg., morning and afternoon.

Vehicle : Hot water.

Method of Preparation

This recipe is generally prepared in the form of pills. Item no. 1, i.e. *lcags phye* should be prepared according to the method described in Appendix-I. To this, powders of the remaining ingredients should be added and mixed well. By adding water, this should be triturated till a fine paste is formed. From out of this, pills of 250 mg. each should be prepared and dried. These pills should be stored in a clean and dry glass bottle.

Indications : Oedema and urinary diseases.

Dose : Two pills of 250 mg. each, morning and afternoon.

Vehicle : Hot water.

16.	'bri mog	Rt.	10G
17.	žu mkhan	Lf.	10G
18.	brag žun	Exd.	25G

Method of Preparation

This recipe is generally prepared in the form of powder. Item no. 5, i.e. *mtshal* should be fried over a pan and then reduced to powder form. Item no. 18, i.e. *brag žun* should be purified according to the procedure prescribed in Appendix-I. All ingredients, except item nos. 3 and 7, should be made to powders and mixed together. At the end, item nos. 3 and 7 should be added and mixed well. This should be stored in a clean and dry glass jar.

Indications : Kidney diseases, obstinate urinary diseases, menorrhagia, liver disorders & elephantiasis.

Dose : 500 mg., morning and evening.

Vehicle : Hot water.

64. Tig ta brgyad pa

S. No.	Drug Name	Parts	Weight
1.	tig ta	Pl.	100G
2.	gser me	Fr.	80G
3.	boñ dkar	Pl.	80G
4.	ru rta	Rt.	80G

6.	hoñ len	Pl.	50G
7.	par pa ta	Pl.	40G
8.	skyer ſun	St.	70G

Method of Preparation

This is generally prepared in the form of pills. All ingredients are made to powders. If this recipe is to be made more effective, then 80 gm. of *doms mkhris* should be added. These powders are to be mixed well and, by adding water, triturated till a fine paste is formed. From out of this paste, pills of 250 mg. each are to be prepared and dried. These pills should be stored in a clean and dry glass jar.

Indications : Bilious fever & jaundice.

Dose : Two pills of 250 mg. each, twice a day during mid-day and mid-night.

Vehicle : Boiled water after completely cooled.

24.	ka ko la	Fr.	5G
25.	ſug tsher	Lf.	5G

Method of Preparation

This recipe is generally prepared in the form of pills. Item no. 17, i.e. *brag zun* should be purified according to the procedure described in Appendix-I. Item no. 12, i.e. *rgun 'brum* should be properly dried before pounding. All ingredients should be made to powders and mixed well. To this, water should be added and triturated till a fine paste is formed. From out of this paste, pills of 250 mg. each should be prepared and dried. These are to be stored in a clean and dry glass bottle.

Indications : Diseases of *mkhris pa* affecting stomach, intestine, bowels, bladder, etc.

Dose : Two pills of 250 mg., each twice a day, during mid-day and mid-night.

Vehicle : Hot water after cooled.

S. No.	Drug Name	Parts	Weight
9.	a ru ra	Fr.	18G
10.	śin tsha	St. Bk.	8G
11.	dwa lis	Fl.	6G

Method of Preparation

This recipe is generally prepared in the form of powder. All ingredients should be made to powders and mixed well. This should then be stored in a clean and dry glass jar.

Indications : Diseases of *bad kan*.

Dose : 500 mg., morning & evening.

Vehicle : Very hot water.

84. Nor bu bdun than

S. No.	Drug Name	Parts	Weight
1.	a ru ra	Fr.	150G
2.	ba ru ra	Fr.	150G
3.	skyu ru ra	Fr.	150G
4.	ma nu	Rt.	150G
5.	sle tres	Pl.	150G
6.	ka n̄ta ka ri	St.	300G
7.	sga skyá	Rt.	100G

Method of Preparation

This is generally prepared in the form of decoction. All ingredients are coarsely pounded. To this, four times of water should be added, boiled, reduced to one fourth and strained. The decoction, thus obtained, is used in medicine. This is stored in a clean jar.

Indications : All diseases of *khrag* and *rlun*.

Dose : One cup of decoction, morning and afternoon.

85. Rnam rgyal than nag

S. No.	Drug Name	Parts	Weight
1.	rgya skyegs	Exd.	25G
2.	btsod	Pl.	25G

9.	gu gul	Exd.	1.5G
10.	stag tsher	St.	25G
11.	žu mkhan	Lf.	25G

Indications : Bronchitis, fever, headache, epidemic fever, colic pain & intestinal disorders.

Dose : One cup of decoction, noon and evening.

86. Rnam rgyal ril bu

S. No.	Drug Name	Parts	Weight
1.	a ru ra	Fr.	150G
2.	ba ru ra	Fr.	50G
3.	skyu ru ra	Fr.	50G
4.	spyi bzur	Lf.	25G
5.	coñ ži	Mi.	25G
6.	brag žun	Exd.	25G
7.	ko byi la	Fr.	20G
8.	dom mukhris	Exd.	2.5G
9.	gañs tig	Mi.	2.5G
10.	gla rtsi	Exd.	2.5G
11.	dzā ti	Fr.	25G
12.	li si	Fr.	25G
13.	cu gañ	Exd.	25G
14.	gur gum	Fl.	25G
15.	sug smel	Fr.	25G
16.	ka ko la	Fr.	25G

Method of Preparation

This is generally prepared in the form of pills. Item no. 6, i.e. *brag žun* and item no. 7, i.e. *ko byi la* should be purified according to the procedure described in Appendix-I. All

ingredients, except item nos. 8 and 10, should be made to powders and mixed together. To this, juice of pomegranate (*se 'bru*) and item nos. 8 as well as 10 should be added, and well triturated till a fine paste is formed. From out of this, pills of 250 mg. each should be prepared and dried in the shade. These pills should be stored in a clean and dry glass bottle.

Indications : Poisonings and diseases of liver and stomach.

Dose : Two tablets of 250 mg. each, morning and afternoon.

Vehicle : Very hot water.

87. Sna srin sel byed gla rtsi lñā

S. No.	Drug Name	Parts	Weight
1.	gla rtsi	Exd.	25G
2.	btsan dug	Rt.	2.5G
3.	śin kun	St.	2.5G
4.	ma ru rtse	Fr.	2.5G
5.	lañ than rtse	An.	2.5G

Method of Preparation

This is generally prepared in the form of powder. Item no. 3, i.e. *śin kun* should be fried over a pan before pounding. Similarly, item no. 5, i.e. *lañ than rtse* should be dried and pounded. Item no. 2, i.e. *btsan dug* is a deadly poison. Since, this recipe is not taken internally but used only for fumigation (inhalation of smoke), its purification and detoxification is not essential. All ingredients are to be

made to powders and mixed together. At the end, item no. 1, i.e. *gla rtsi* should be added and mixed well. One tea spoonful of this powder should be poured over burning charcoal, and the smoke that comes out should be deeply inhaled.

Indications : Chronic rhinitis and sinusitis.

Method of use : Smoke of this recipe is to be inhaled.

88. Sna sman dri bzañ bcu pa

S. No.	Drug Name	Parts	Weight
1.	gur gum	Fl.	2.5G
2.	li si	Fr.	2.5G
3.	ghi vam	Exd.	2.5G
4.	ka ko la	Fr.	2.5G
5.	dzā ti	Fr.	2.5G
6.	ru rta	Rt.	5G

6.	thañ phrom dmar po	Fr.	10G
7.	gul nag	Exd.	10G
8.	ma ru rtse	Fr.	10G

Method of Preparation

This recipe is generally prepared in the form of pills. Item nos. 1 to 3, namely *dñul chu*, *mu zi* and *btsan dug* should be purified and detoxified according to the procedures described in the Appendix-I. First of all, item nos. 1 and 2 should be triturated till a black and fine powder like collyrium is formed. To this, the powder of the remaining ingredients, except item no. 4, should be added. At the end, water and item no. 4 should be added and well triturated till a fine paste is formed. From out of this, pills of 250 mg. each should be prepared and dried in the shade. This should be stored in a clean and dry glass bottle.

Indications : Chronic rhinitis and other nasal disorders.

Dose : One pill of 250 mg., morning and afternoon.

Vehicle : Very hot water.

90. Pad rag mdog ldan

S. No.	Drug Name	Parts	Weight
1.	gur gum	Fl.	100G

10.	sug tsher	Lf.	75G
11.	brag zun	Exd.	75G
12.	mkhal zo sa	Fr.	75G

Method of Preparation

This recipe is generally prepared in the form of powder. Item no. 11, i.e. *brag zun* should be purified according to the method described in Appendix-I. All ingredients, except item no. 6, should be made to powders and mixed together. Thereafter, item no. 6 should be added and mixed well. This should be stored in a clean and dry glass jar.

Indications : Spermatorrhea and kidney and prostate disorders.

Dose : 500 mg., mid-day & mid-night.

Vehicle : Very hot water.

Indications : Influenza, cold, pharyngitis, dyspnoea and pain in the body.

Dose : 500 mg., morning & evening.

Vehicle : Very hot water.

9.	lug ru dmar po	Fl.	50G
10.	lug ru smug po	Fl.	50G
11.	spañ rgyan dkar po	Pl.	50G

Method of Preparation

This recipe is prepared in the form of pills. All ingredients should be pounded separately and mixed together. By adding sugar syrup or honey, this should be triturated well till a fine paste is formed. From out of this paste, pills of 250 mg. each should be prepared and dried. These are to be stored in a clean and dry glass bottle.

Indications : Stammering, dumbness, hoarseness of voice and loss of memory.

Dose : Two pills of 250 mg. each, in the morning.

Vehicle : Hot water.
